Art Unit: 1623

The amendment received on 10/11/2002 has been entered.

The applicant's remarks on the rejections of claims 1-24 rejected under 35

U.S.C. 103(a) as being unpatentable over Lim et al. in view of Liu, is acknowledged.

The rejection of claims 1-24 under 35 U.S.C. 103(a), has been withdrawn. The rejection of claim 21 has been overcome through applicants' amendment to the claim.

Claims 1,2, 4-13,15-24 and 28-31 are currently pending in this application.

Provisional "Non-Statutory" Double Patenting Rejection

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1,2, 4-13,15-24 and 28-31 are rejected under the judicially created doctrine of double patenting over claims 21,24,25,28-34,37 and 38 of recently allowed U. S. Patent Application. 09/887,399 (Dec., 2002), since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Art Unit: 1623

The subject matter claimed in the instant application is fully disclosed in the referenced recently issued application and would be covered by any patent granted on that issued application since the referenced issued application and the instant application are claiming common subject matter, as follows:

Although the conflicting claims are not identical, they are not patentably distinct from each other because the present claims are broadly directed toward a composition comprising ginsenoside (Rb_1) for the regeneration and/or reconstruction of cerebrovascular networks after cerebral stroke and for the inhibition of secondary nervous tissue degeneration and a method for screening active substances for treating diseases of nervous tissue or spinal cord tissue by using ginsenoside Rb_1 as a leading compound which encompass the invention cited in claims 21,24,25,28-34,37 and 38 of recently allowed U. S. Patent Application 09/887,399, which are directed toward a pharmaceutical composition consisting of ginsenoside Rb_1 or its salt and carriers for intravenous administration, a method for manufacturing the its preparations and a method of treatment of brain and nervous diseases using the ginsenoside Rb_1 .

The issued patent application 09/887,399, differ from the present application in that it does not include the pharmaceutical composition for prevention, treatment or therapy of the disease causing the paralysis or paraplegia and a method for screening active substances for treating diseases of nervous tissue or spinal cord tissue by using ginsenoside Rb_1 as a leading compound. (435 class)

Art Unit: 1623

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application, which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
